Links, statuses, glossary

CHAPTER 1

Quick start

EVENT APP keeps everything about a fest in one place. A college runs one or more events; each event has departments; people are given roles inside them. Here is the shortest path from an empty app to a working event.

Super Admin → College → Event → Departments → Team → Participants

The first hour

1. **Create the college.** `Colleges → New college`. Give it a name and a short code such as **CET**; the code becomes part of public links.
2. **Appoint a College Admin** (optional). Open the college and invite the staff member who manages its events.
3. **Create the event.** `Events → New event`: pick the college, name, dates and venue. The app creates 18 departments and 10 sponsorship packages for you.
4. **Appoint Event Admins.** `Event → Settings → Event administrators → Appoint event admin`.
5. **Appoint department heads.** `Event → Departments → (department) → Assign person`, position **Head**.
6. **Add competitions** under `Event → Registrations`, with fees and team sizes.
7. **Turn on the public registration page** in `Event → Settings → Registration settings` and share the link.
8. **Set the budget** in `Event → Finance → Budget` and give each department its allocation.

> **TIP**
>
> Next year, use `Event → Settings → Copy as new event`. It copies departments, packages, competitions, schedule, task checklist and budget split with the dates moved forward.

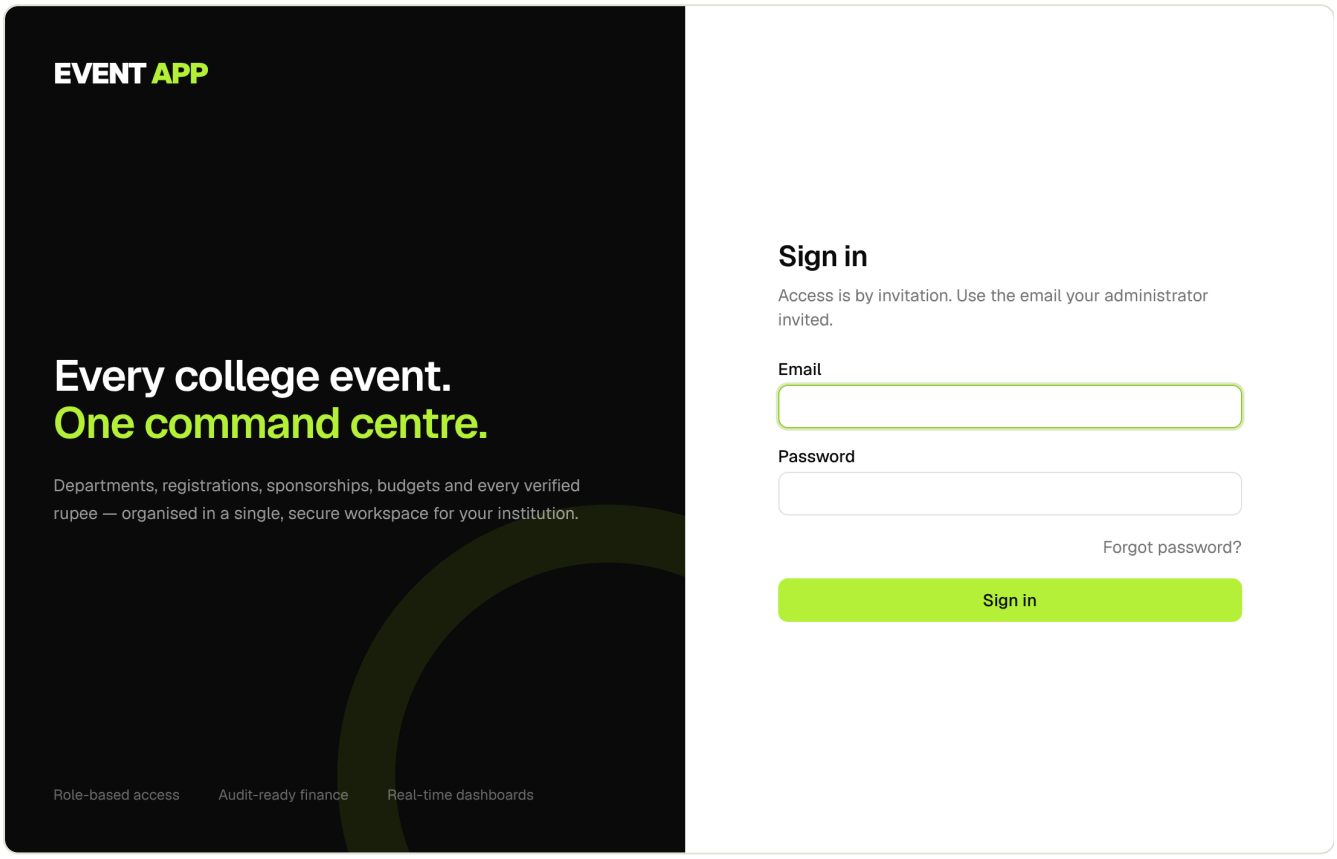

Finding your way around

- **Left menu, top part:** things across the whole app: Overview, Colleges, Events, Reports, Users, Activity & audit, Settings. You only see what your role allows.
- **Left menu, event part:** once you open an event, its modules appear: Departments, Team, Registrations, Check-in, Finance, Sponsorship, Judging, Certificates, Tasks, Duty roster, and more.
- **Top bar:** search, the event switcher, the notification bell, the light/dark switch and your account menu (Profile, Install app, Sign out).

CHAPTER 2

Signing in & your account

EVENT APP is invitation-only. Nobody can sign up on their own; an administrator invites them by email.

The sign-in screen. “Forgot password?” sends a reset link to the invited address.

Accepting an invitation

1. Open the email titled **“You're invited to EVENT APP”** (check spam).
2. Click **Accept invitation**. The app opens and asks you to choose a password: at least 10 characters with letters and numbers.
3. You're signed in. Your home page lists the events and roles you've been given.

> **GOOD TO KNOW**
>
> After you set or change a password, Supabase (the app's sign-in service) emails a short “your password was changed” notice. It has no link and needs no action.

Forgot your password

1. On the sign-in page, click **Forgot password?** and enter the email your invitation was sent to.
2. Open **“Reset your EVENT APP password”** and click **Reset password**. The link expires in an hour.

3. Choose a new password. If no email arrives, the address probably isn't the one you were invited with; ask your administrator to send a reset from the Users page.

Your profile

`Account menu → Profile` holds:

- **Your details and photo**: name, phone, job title.
- **Notifications on this device**: phone or desktop alerts. On iPhone/iPad, install the app first (below), open it from the Home Screen, then turn notifications on.
- **Two-step sign-in**: scan the QR code with Google Authenticator, Microsoft Authenticator or Authy, then type the 6-digit code. From then on you'll enter a code after your password. Strongly recommended for admins and finance roles.
- **Calendar sync**: one click gives a private link to add to Google, Apple or Outlook Calendar. Your events, schedule, task deadlines and duties appear there. Reset the link if it's ever shared by mistake.
- **Change password**.

Install the app

Device	How
Windows / Mac with Chrome or Edge	Install icon in the address bar, or `Account menu → Install app`
Mac with Safari	File → Add to Dock
Android	`Account menu → Install app`, or the browser menu → Install app
iPhone / iPad	Open in Safari → Share button → **Add to Home Screen**

The installed app updates itself whenever the app is improved. It needs an internet connection; without one it shows an offline page.

CHAPTER 3

Roles & permissions

What you can see depends on your role. If a module is missing from your menu, you don't have the permission for it; that's by design, not a bug.

Role	Can do
Super Admin (one person)	Everything, in every college. Manages all users and their access, sees all activity, runs global reports. Shown to others as “Contact Admin”. This role can't be given to anyone else.
College Admin	Everything inside their college: creates events, appoints Event Admins, manages college users, college reports, deletes events without money records.
Event Admin	Everything inside one event: departments, team, finance, registrations, sponsorship, operations, judging, certificates, closing.
Finance Head	Finance view and management, expense review, budgets, registration and sponsor figures.
Registration Head	Registrations, desk payments, exports, gate check-in.
Sponsorship / Media / Marketing Head	Their module plus their department workspace.
Department Head / Assistant Head	Their department: team, tasks, expense requests, budget requests, announcements, duty roster for the department.
Team member	Their department, their tasks and duties. Members of the Registration department can use gate check-in.
Event viewer	Read-only view of the event. Use it for outside judges.

Changing what a role can do

The Super Admin can adjust permissions per role in `Settings → Permissions`. Changes apply to everyone with that role straight away.

> **HOW DEPARTMENT ROLES WORK**
>
> A department role only works inside its own department. A Media Head can manage Media's tasks and expenses, but not Finance's.

Giving someone access

- **College Admin:** `Colleges → (college) → Add admin`, or `Users → (person) → College access`.
- **Event role:** `Event → Team → Add person`, or `Event → Settings → Appoint event admin`.
- **Department position:** `Event → Departments → (department) → Assign person`.

In each dialog choose **Existing user** to pick someone who already has an account, or **New person (email)** to invite someone new.

Taking access away

- **Remove** next to a person ends that one role.
- **Replace** next to an admin hands the admin job to someone else in one step.
- **Remove all access** on `Users → (person)` ends every role they hold, everywhere. Super Admin only.

CHAPTER 4

For the Super Admin

Users

`Users` lists everyone. Badges show **Invite pending** (not accepted yet) and **2-step** (two-step sign-in on). The ⋯ menu on each row offers:

- **Resend invitation**, for people who lost or never got the email.
- **Send password reset**, which emails a reset link to their exact account address.
- **Suspend account / Reactivate account**. Suspension takes effect immediately; nothing is deleted.

One person's access, in one place

Click a name on the Users page to open their access page:

- **College access**: make College Admin, or remove.
- **Event roles**: add or remove event-wide roles.
- **Department assignments**: assign as head, assistant head or member of any department, or remove.
- **Remove from an event completely**: ends every role there and unassigns their open tasks.
- **Remove all access**: ends every college, event and department role they hold, everywhere. Their account and history stay, so you can give them a new, separate role afterwards.
- **Access history**: every past assignment.

Replacing an administrator

To hand an admin job to someone else in one step:

1. Go to the admin list: `Colleges → (college) → administrators` for a College Admin, or `Event → Settings → Event administrators` for an Event Admin.
2. Click **Replace** next to the current admin.
3. Enter the new person's name and email. An existing user is found automatically; a new person gets an invitation.
4. The new person becomes admin first, then the previous admin's admin access ends. Their history is kept.

To give the previous admin a different role, use their access page (above) or the Team and Departments pages.

Suspend, or delete and invite again

Suspend	Delete account

`Users → (person) → Suspend`. Blocks sign-in straight away. Roles and the account stay, and **Reactivate** undoes it.	`Users → (person) → Delete account`, then type their email. Ends every role, removes their login and frees the email address. Past records stay and show the old name marked "(deleted)".

After deleting, invite the same email again from `Users → Invite user`. They arrive as a brand-new user, with only the role you give them now.

Cancelled & deleted by admins

Your `Overview` dashboard has a **Cancelled & deleted by admins** card. It lists every event and competition that another admin cancelled or deleted, with who did it, when and why, and a count.

- Things you cancel or delete yourself are not listed.
- Click **Clear** to empty the list and reset the count to zero. The Activity log still keeps the history.

Activity & audit

`Activity & audit` has two tabs:

- **Activity**: what people did, in plain language, across every college and event.
- **Data changes**: a permanent record of every record created, edited or deleted.

Both can be searched, filtered and exported.

Global reports

`Reports` runs any of the 12 reports across all colleges, one college, or one event. College Admins see their own colleges only.

Your privacy

Everyone else sees you as **"Contact Admin"**, with no name, email, phone or photo. Only you see your real details.

CHAPTER 5

Colleges & events

Create a college

1. `Colleges → New college`: name, short code, city and contact details. Upload a logo if you like.
2. Open the college to add College Admins, see its events and edit its details. Archive a college you no longer use; its records stay.

Create an event

1. `Events → New event`: college, name, web name (slug), category, dates, venue, registration window, contact details, currency.
2. Optionally invite the first Event Admin in the same form.
3. The event opens with 18 departments, 10 sponsorship packages and an empty budget, ready to fill.

Event settings

`Event → Settings` contains:

- **Event details**: everything from the create form.
- **Lifecycle**: the event status, plus Archive / Restore.
- **Branding**: logo and banner, shown on the public page and tickets.
- **Event administrators**: appoint, change role, remove.
- **Registration settings**: duplicate rules, team sizes, and the **Public registration page** switch with its link.
- **Copy as new event**: start next year's edition.
- **Cancel event**: Super Admin and College Admins only. College Admins must give a reason.
- **Delete event**: Super Admin and College Admins only.

Event statuses

Planning → Registration open → Registration closed → Upcoming → Live → Completed → Archived

Registrations are refused when the event is **Registration closed**, **Completed**, **Archived** or **Cancelled**, or outside the registration window.

Cancelling an event

1. `Event → Settings → Cancel event`, then give a reason.
2. Registrations close at once and the public page says the event has been cancelled. Every record is kept.

3. Changed your mind? Click **Restore event** on the red banner at the top of Settings. The event returns to Planning.

Archive or delete?

Cancel	Archive	Delete
The event is called off. Registrations close, everything is kept, and it can be restored.	Hides the event from day-to-day lists and keeps everything for reports and audit. Can be restored.	Removes the event permanently. You must type its name to confirm. Not allowed once it has real registrations, payments or financial records; archive those instead.

CHAPTER 6

Departments & team

Every event starts with 18 departments: Finance, Media and PR, Marketing, Sponsorship, Registration, Technical, Logistics, Stage and Production, Hospitality, Transportation, Accommodation, Food and Catering, Security, Creative and Design, Documentation, Volunteer Management, Guest Management and Public Relations.

Managing departments

- **Add:** `Event → Departments → New department`.
- **Edit or archive:** open the department → **Edit**.
- **Delete:** open the department → **Delete**, then type its name. Its tasks move to the event level. A department with a budget or expense records can only be archived.

The department workspace

Each department page shows:

- progress, team size, pending, completed and overdue tasks;
- the budget and spending;
- expense requests;
- department announcements;
- recent activity.

Appointing people

1. Open the department and click **Assign person**.
2. Choose **Existing user** and pick a name, or **New person (email)** to invite someone.
3. Pick the position: **Head**, **Assistant head** or **Member**. The role is chosen automatically for the department, or you can pick one.
4. The person is notified. Removing someone keeps their history.

The Team page

`Event → Team` lists everyone in the event with their event roles and departments. **Add person** gives someone an event-wide role (for example Event Admin or Viewer). The list can be exported.

CHAPTER 7

Registrations

1. Set up competitions

In `Event → Registrations`, add each competition with:

- a short **code**;
- the **fee** (0 for free);
- **Individual** or **Team**, with minimum and maximum team size;
- an optional **capacity**, start time, venue and rules link.

Each competition card also has **Cancel** (closes it and hides it from the public page; registrations stay, and **Restore** reopens it) and **Delete** (only for competitions nobody has registered for).

2. Open the public registration page

1. `Event → Settings → Registration settings` → switch on **Public registration page** → **Save**.
2. Copy the link under the switch. It looks like `event-app-blush.vercel.app/e/college-code/event-name`.
3. Share it on posters, WhatsApp and Instagram. Participants register without an account.

3. Tickets

- After registering, each participant sees their **QR ticket** and gets it by email.
- **Free** registrations are confirmed instantly.
- **Paid** registrations show “Payment pending: pay at the registration desk” until staff record the payment.
- Anyone can reopen their ticket from the email link. Organisers can reopen or re-email it from `Registrations → (registration) → Ticket & check-in`.

4. The registration desk

- **Add offline registration**: for walk-ins.
- **Record payment**: cash or UPI collected at the desk. The registration becomes Confirmed and the money appears in Finance.
- **Confirm, Waitlist, Cancel registration**: change status, with a reason.
- **Record refund**: money given back; it is recorded in the ledger.
- **Delete participant** (Super Admin only): open the registration, click **Delete participant** and type its registration number. This removes it permanently, with its ticket, scores, results and certificates. Participants whose payments are already in the finance ledger can't be deleted; cancel the registration and record a refund instead.

5. Website integration (optional)

If the college has its own website, `Event → Integrations` creates API keys so the website can send registrations in. Use **Test** keys first, then live keys. Online payment (Razorpay) is built in but currently switched off.

> **TIP**
> Duplicate rules, such as one registration per email per category, are in Registration settings. They stop the same person registering twice by mistake.

CHAPTER 8

Event day

Gate check-in

Who can use it: Event Admins, the Registration Head, and members of the Registration department.

1. On a phone, open the app in **Chrome** (Android) or **Safari** (iPhone), not inside WhatsApp or Gmail. Go to `Event → Check-in`.
2. Tap **Start camera** and allow camera access. Point it at the participant's ticket QR.
3. If the live camera won't start, use **Scan with a photo**: take a picture of the QR with the phone's camera app. You can also type the code printed under the QR.

Result	Meaning / what to do
✅ Checked in. Welcome!	Let them in.
⚠️ Already checked in	This ticket was used before; the time is shown. Check ID.
⚠️ Not confirmed: payment pending	Send them to the desk to pay, then scan again.
⛔ Registration cancelled	Not valid for entry.
⛔ Ticket not found for this event	Wrong event or a fake ticket.

The counters at the top update live. A mistaken check-in can be undone from the registration's page.

Duty roster

1. `Event → Duty roster → New shift`: duty name, place, department, start and end, people needed, notes.
2. On the shift card, **Add a person → Assign**. They're notified. The app refuses double-booking someone for overlapping shifts.
3. Volunteers see **My duties** and tap **I'm here** from 30 minutes before their shift.
4. Leads mark people ✓ present or ✗ absent. The page counts unfilled spots, present and no-shows.

Schedule and operations

- `Event → Schedule`: the master timeline of the event days.
- `Event → Operations`: venues, vendors, inventory and emergency contacts.

CHAPTER 9

Finance

Finance has four tabs: Overview, Ledger, Expenses and Budget. Money records can't be edited or deleted; mistakes are corrected with a reversal, so the books always add up.

Budget

1. `Finance → Budget`: set the total event budget.
2. Allocate an amount to each department.
3. Departments get alerts at **75%**, **90%** and **100%** of their allocation.
4. Departments can request more through a **budget revision**; finance approves or rejects it.

Income

- Registration income is recorded automatically when desk or online payments are confirmed.
- Sponsorship income is recorded when a sponsor payment is verified.
- Anything else (donations, stall rent): **Record income**.

Expense requests

Draft → Submitted → Under review → Approved → Partially paid → Paid

1. A department head raises a request from their department page: **Request**. They fill in the title, category, amount, vendor and justification, attach the invoice, then **Submit for review**.
2. Finance clicks **Start review**, then:
   - **Approve**, optionally for a smaller amount;
   - **Send back** for changes;
   - **Forward** to a higher approver;
   - **Reject**.

   Requests above the event's approval limit must be approved at the higher level.
3. When paid, use **Record payment**. This creates the expense entry in the ledger and updates the department's spending.

Ledger

Every money movement has a number (TXN-...), date, category, method and reference. Finance can:

- **Verify** or **Reject** entries that are waiting;
- **Reverse** a verified entry with a reason.

How the totals are calculated

Figure	Calculation
Total income received	Registration + sponsorship + other income (verified only)
Expenditure paid	Verified expenses
Approved, unpaid	Approved minus already paid
Outstanding sponsorship	Agreed minus received, for confirmed deals
Net cash position	Income – refunds – expenditure paid

CHAPTER 10

Sponsorship

Pipeline stages

Lead identified → Contacted → Meeting scheduled → Proposal sent → Negotiation → Confirmed → Partially paid → Fully paid

Deals that don't work out are marked **Rejected** or **Lost**.

1. **Packages:** 10 are ready (Title, Powered by, Associate, Gold, Silver, Bronze, Media, Technical, Food, Custom). Edit their prices, benefits and slots.
2. **Sponsors:** add the company, contact person and owner from your team.
3. **Deals:** create a deal for a sponsor with a package, proposed and agreed amounts, and the expected payment date. Move it across the pipeline board as talks progress.
4. **Payments:** on the deal, **Record payment** with the date, method, reference and receipt. Finance **Verifies** it, which adds the income to the ledger and updates the amount received.
5. **Deliverables:** logos, stalls, mentions, each with an owner and due date. Mark them done; pending deliverables appear on the closing checklist.

CHAPTER 11

Tasks, media & marketing

Tasks

- **Three views:** a board (drag between columns), a list, and a calendar. Filter to My tasks, a department, or all.
- **Each task has:** a department, priority, start and due dates, location, assignees, subtasks, comments and attachments.
- **Statuses:** Not started, In progress, Under review, Completed, On hold.
- **Reminders:** assignees get due-soon and overdue reminders automatically, and a notification when they're assigned.

Media & PR

Track posters, videos, press releases and photos, with owners, due dates and approval status.

Marketing

Record campaigns per platform: budget, spend, reach, impressions, engagement and registrations generated. The Marketing report works out the cost per registration.

CHAPTER 12

Judging & results

Organisers set up judging; judges score on their phone or laptop; the app ranks entrants; organisers publish the winners.

Set up a competition (organisers)

1. `Event → Judging → (competition) → Setup`.
2. Add **criteria**, each with a maximum score and a weight. Example: Content out of 10, weight 2; Presentation out of 10, weight 1.
3. Add **judges**. Outside judges must first be added to the event, for example as Viewer, under `Team → Add person`.
4. **Save setup**. Judges are notified.

Scoring (judges)

1. `Event → Judging` shows only the competitions you judge.
2. Pick an entrant, enter a score for each criterion (and a comment if you like), then **Save scores**. Scores can be changed until results are published.

Only confirmed registrations appear as entrants.

Leaderboard and publishing (organisers)

- The **Leaderboard** ranks entrants by the weighted average of all judges, as a percentage. It also shows how many judges have scored each entrant.
- Choose awards (Winner, Runner-up, Second runner-up, Special mention…) and click **Publish results**.
- Publishing locks the scores, shows the results on the public event page, and makes winner certificates available.
- **Unpublish results** reopens scoring if a correction is needed.

CHAPTER 13

Certificates

1. `Event → Certificates → Certificate details`: enter up to two signatories (name and title) and an optional footer line, e.g. “Organised by the Student Council”.
2. **Issue participation certificates**. With “Only people who checked in” ticked, only attendees get one. Every team member gets their own.
3. **Issue winner certificates** after results are published.
4. **Email unsent certificates** sends download links, up to 80 per click (Gmail allows about 500 emails a day).

Each certificate is a landscape PDF with a QR code. Scanning it opens a verification page that shows whether the certificate is genuine. If a certificate was issued by mistake, **Revoke** it: the verification page then says “revoked”. **Restore** undoes this.

> **TIP**
> Issuing again is safe. People who already have a certificate are skipped automatically.

CHAPTER 14

Communication

Announcements

- **Everyone** (Super Admin), **a college**, **an event** (`Event → Announcements`) or **a department** (on its page).
- Set the priority (normal, important, urgent) and pin important ones. Everyone in the audience gets a notification.

Notifications

- The bell shows new notifications, and `Notifications` lists them all.
- Turn on **push notifications** in your Profile to get them on your phone or computer.
- You're notified about assignments, approvals, duties, announcements, new registrations, judging and reminders.

Documents

Upload agreements, invoices, receipts and plans to `Event → Documents`, or attach them to expenses, deals and tasks.

Files are private and open through secure, expiring links. Choose who can see each one:

- **Event**: everyone in the event;
- **Department**: that department only;
- **Finance**: finance roles;
- **Restricted**: event managers.

Archive documents you no longer need.

CHAPTER 15

Feedback surveys

1. `Event → Feedback → New survey`. It starts from a template: overall rating (1–5), “How likely are you to recommend…” (0–10), what you liked, and what to improve. Edit, reorder or add questions (rating, 0–10, multiple choice, written answer).
2. Choose who answers:
   - **Participants**: each person gets a personal emailed link and can answer only once.
   - **Anyone with the link**: share one link anywhere.
3. Set the status to **Open** and save. For participant surveys, click **Email participants who haven't been invited**, up to 80 per click.
4. Watch the **Results**: averages, bar charts, the recommendation score (promoters minus detractors) and written answers. Close the survey when done.

The latest survey's score also appears on the event closing page.

CHAPTER 16

Reports & exports

`Event → Reports` for one event; `Reports` in the main menu for several events or colleges (Super Admin and College Admins).

Report	Shows
Event summary	Registrations, income, spending, sponsorship, task completion
Registrations	Every registration with status and amounts
Payments	Online payment attempts and results
Income	Income and refunds from the ledger
Expenses	Requests with requested, approved and paid amounts
Budget utilization	Allocated vs approved vs paid, per department
Sponsorship	Deals by stage, agreed, received, outstanding
Department performance	Team, tasks, overdue work, budget use
Tasks	Status, due dates, on time or late
Marketing	Spend, reach, engagement, cost per registration
Participants	Contact details, college, team, competitions
Event closing	Final settlement and closing status

Filter by date, department, category and status. With the “Export reports” permission you can download **CSV**, **Excel** or **PDF**. Each report shows what your role may see; a department head sees only their department.

CHAPTER 17

Closing an event

1. Set the event status to **Completed**. You can do this from the closing page with **Mark event completed**.
2. Open `Event → Closing`. The checklist shows:
   - **Red items, which block closing:** unverified transactions, open expense requests, unverified sponsor payments.
   - **Amber items, which are warnings:** unpaid approved expenses, unpaid registrations, unfinished tasks, pending sponsor deliverables.
3. Review the final figures, department performance and feedback score. Export the final reports for your records.
4. Click **Close finances** and write who reviewed the figures. The figures are frozen, and no new money entries can be added.
5. **Archive event** when you're done. It stays available for reports and audit.

> **NEED TO FIX SOMETHING AFTER CLOSING?**
>
> Only the Super Admin can **Reopen finances**, with a reason. The reason is added to the closing note and the audit log.

CHAPTER 18

Troubleshooting & FAQ

I didn't get an invitation or reset email.

Check spam and promotions. Make sure it's the address you were invited with. The Super Admin can use **Users → ⋯ → Resend invitation** or **Send password reset**.

I got “your password was changed” with no link.

That's an automatic security notice after you set or change a password. Nothing to do.

A menu item is missing.

Your role doesn't include it. Ask an admin to change your role, or the Super Admin to adjust the permission matrix.

The camera doesn't start on the check-in page.

Open the app directly in Chrome or Safari, not inside WhatsApp or Gmail. Allow the camera in the site settings (the lock icon next to the address), or use **Scan with a photo**, or type the code.

A participant registered twice.

Cancel one registration with a reason. Tighten the duplicate rule in Registration settings.

An expense was paid twice or recorded wrongly.

Ledger entries can't be edited. Finance uses **Reverse** on the wrong entry, then records the correct one.

I can't delete an event or department.

It has registrations, payments or money records, which must be kept. Archive it instead.

Push notifications don't arrive on iPhone.

Install the app to the Home Screen, open it from there, then turn notifications on in Profile. iOS 16.4 or later is needed.

Ticket or certificate emails aren't sending.

The app sends through the Gmail account set up in Vercel. If Gmail's daily limit (about 500 emails) is reached, try the next day. The links can also be shared directly.

I lost my phone with two-step sign-in.

Ask the Super Admin to help reset your account access.

CHAPTER 19

Quick reference

Links

What	Address
The app	`https://event-app-blush.vercel.app`
Public event page	`/e/<college code>/<event web name>`
Ticket	`/t/<ticket code>`
Certificate check	`/c/<certificate number>`
Survey	`/s/<survey link>`

Registration statuses

Pending (waiting for payment or confirmation) · **Confirmed** · **Waitlisted** · **Cancelled**.

Payment statuses

Not required (free) · **Pending** · **Paid** · **Failed** · **Refunded** · **Partially refunded**.

Glossary

Ledger	The permanent list of all money that actually moved.
Allocation	The part of the event budget given to one department.
Reversal	A correcting entry that cancels a wrong ledger entry.
Deliverable	Something promised to a sponsor (a logo on the banner, a stall).
Recommendation score	% of people who'd strongly recommend (9–10) minus % who wouldn't (0–6).
Sandbox / test key	A practice API key whose registrations are marked as tests.

> **NEED HELP?**
> Contact your event's administrator, or the Super Admin (shown as “Contact Admin”).
